    void changeGear(int newValue){
        gear = gear + newValue;
        System.out.println(" \nGear: " + gear);
    }
    void speedUp(int increment){
        speed = speed + increment;
        System.out.println(" \nSpeed: " + speed);
    }
}

public class BicycleDemo {
    public static void main(String[] args) {
        Bicycle bike = new Bicycle();
